## IOG SALTEX PRESS RELEASE

**DATE: Sept 4, 2007**

**RELEASE: Immediate**

### **NEW – Pro-Cast bulk top dresser now with enhanced spinner action**

The Fairways Group has updated its capacious Pro-Cast bulk top dresser range with more than just a bright new look. It has been enhanced with new profile discs and a single aperture gate to allow free flowing material and a consistent spread pattern that delivers with precision and reliability.

The stainless steel rear delivery system has been carefully re-engineered to optimise the spreading function with a brand new spin deck offering the latest hydraulic action with infinite adjustment for speed. Powerful twin spinners achieve a spread of up to 16m at 2m<sup>3</sup> per minute even when distributing wet material.

The Pro-Cast has a choice of four generously-sized 3mm welded steel hoppers. With capacities ranging from 2000 to 4750 litres the bigger units in particular offer excellent productivity and efficiency, saving on journeys back and from base and refilling time. Indeed, the all-welded box section chassis and vulcanised conveyor belt means trouble free operation and require minimal maintenance.

Despite its size and robust build quality, the trailed top dresser is surprisingly nimble. Its light weight design minimises ground compaction, working effectively without damaging turf, the flotation tyres respectful of the ground they tread. With safety a key feature, all Pro-Cast machines have a wide axle track, and low profile design. A low centre of gravity increases stability on undulating ground.

More

Standard features include a manual parking brake, a height adjustable draw bar, a draw bar jack, a high-pressure oil filter to protect the hydraulic motor and digital tachometer for monitoring spinner speed. Extra wide tyres and a PVC hopper cover are optional extras.

An adjustable hitch height fits a variety of manufacturers' tractors from 40-70 hp. Ideal for parks, playing fields, golf fairways it is a real top drawer top dresser aimed at clubs and local authorities. Prices start at £13,950, ex VAT.
